

Early Years Support for children with Special Educational Needs: Parent / Carer guide

The Graduated Approach 0-5 years

All Nottinghamshire children in Early Years settings (0-5 years) can expect:

- Regular communication with parents.
- Planned individual learning.
- Regular assessment of the environment.
- Individual progress to be recorded.
- A curriculum that is matched to the individual child.

For more information about services offered across Nottinghamshire visit the **Nottinghamshire Local Offer:**
nottshelpyourself.org.uk

If your child requires additional support, your child's Early Years setting will use the Graduated Approach to meet their needs. Your child does not require a diagnosis to receive this support.

This is the **Graduated Approach**:

Assess needs
Plan what to do
Do the plan
Review how it's gone

The assess, plan, do, review process is a continual cycle.

Speak to your Early Years setting for more information. If your child is not in an Early Years setting or is being educated at home, contact Nottinghamshire's Healthy Families Team.

Speech & Language Therapy

For more information or to make a referral click here. 

Myth busting about Education, Health and Care (EHC) Plans

Myth Vs Facts

If my child has an EHC Plan, they are guaranteed a special school place.

An EHC Plan does not guarantee a placement in a special school. The majority of Nottinghamshire's children and young people with Special Educational Needs or Disabilities have their needs met within local mainstream early years settings, schools or colleges. Across Nottinghamshire, there are children with EHC Plans attending both mainstream and special schools / settings.

My child needs an Education, Health & Care Plan to get the right support.

In the Early Years in Nottinghamshire, all children have the same access to services and funding with or without an Education, Health & Care (EHC) Plan.

My child needs a diagnosis to get the right support.

Although a diagnosis might be reassuring, in Nottinghamshire, children are given access to services and funding in response to their needs so a diagnosis is not necessary.
